

VIZpin Solar Kit

The VIZpin Solar Kit is a self-contained outdoor access gate controller that is perfect for pedestrian and pool gates or any installation where it is difficult or expensive to install electrical service. Designed for use with any 12VDC gate or latch, the VIZpin Solar Kit provides continuous service with just 3 hours of sunlight each day, or 650 activations with battery only.*

The VIZpin Solar package Includes:

1. VIZpin Gate Controller with built-in Bluetooth Smart Device**
2. VIZpin LITE Service: Cloud-based keyless entry service for granting and revoking 24/7 Smartkeys
3. 5 Smartkeys
4. Solar Panel: Includes 25-year power output guarantee
5. Absorbent Glass Mat (AGM) 12V Battery
6. Battery Charge Controller: Protects against battery over-charging or over-discharging
7. IP65-rated Nema Enclosure
8. Mounting Hardware: Fits 2" to 4" poles

Upgrade to VIZpin PLUS

VIZpin PLUS is our full-featured access management service that lets you grant and revoke Smartkeys with custom schedules. It includes the first 500 Smartkeys and stores 30 days of activity history.

1 and 3 year VIZpin PLUS Service Available

*Based on 250mA electric door strike with 3 second activation, 100 activations/day

**All VIZpin systems can be configured for fail-secure or fail-safe operation to adhere with  294 and other industry safety standards
