

Entegrity Smart Case Study

West Coast Self Storage

Easy Entry Solution for Customers

The Customer

West Coast Self-Storage located in Seattle, Washington and Lake Oswego, Oregon are dedicated to having the most high tech storage facilities in the area.

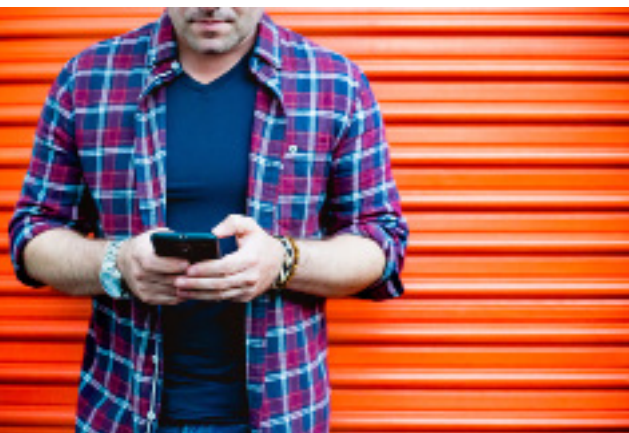

The Challenge

With over 700 units at each location, West Coast Self-Storage wanted to fully enhance their system by giving their tenants the ability to use their cell phone to get into the facility. "We wanted to offer easier entry solutions for customers," said John Wollam, security installer and owner of Stor-Guard Self-Storage Security Systems. John explained how they wanted give storage renters the ability to access the facility without having to roll down windows at gates or having to get out of the car to manually enter a pin.

The Solution

West Coast Self-Storage added Entegrity Smart's door/gate controller to their main gate. Now customers can simply unlock the gate with their phone rather than worry about cards, fobs or rolling windows down. West Coast Self-Storage thrives on offering the most convenient solutions for their customers and were pleased with how easy it was to integrate smartphone access control into their existing systems.

**"We wanted to offer easier entry solutions for customers."
- John Wollam**

Highlights

Simplicity – Entegrity Smart provides users access to gates or doors for which they've been granted keys.

Ease of Use – Users only need to be in proximity to a reader and the only thing they need to physically touch is their smartphone.

Convenience – Customers need not remember keys or fobs to access their storage unit. Your phone is your key!

About Entegrity Smart

Entegrity Smart is powered by VIZpin and offers smart property systems for managing visitors and controlling access to your entire property. Our cloud-based system is the most secure, convenient, and affordable way to unlock doors, gates, garages and more with your smartphone. Our products and services are available through a network of Certified Partners, OEMs and Licensees. VIZpin Inc. is privately held and based in PA.
